Orientation

March 8 2025

## what is this mentorship about?

- learn hecking right way
- core topics and fundamentals
- hands-on approach dherai
- building a STRONG foundation

how this works?

weekly sessions, read handbook and try, solve them, capstone for each module and create by notetaking and sharing

LLMs

try to use it only for workflow, but never for generating whole things

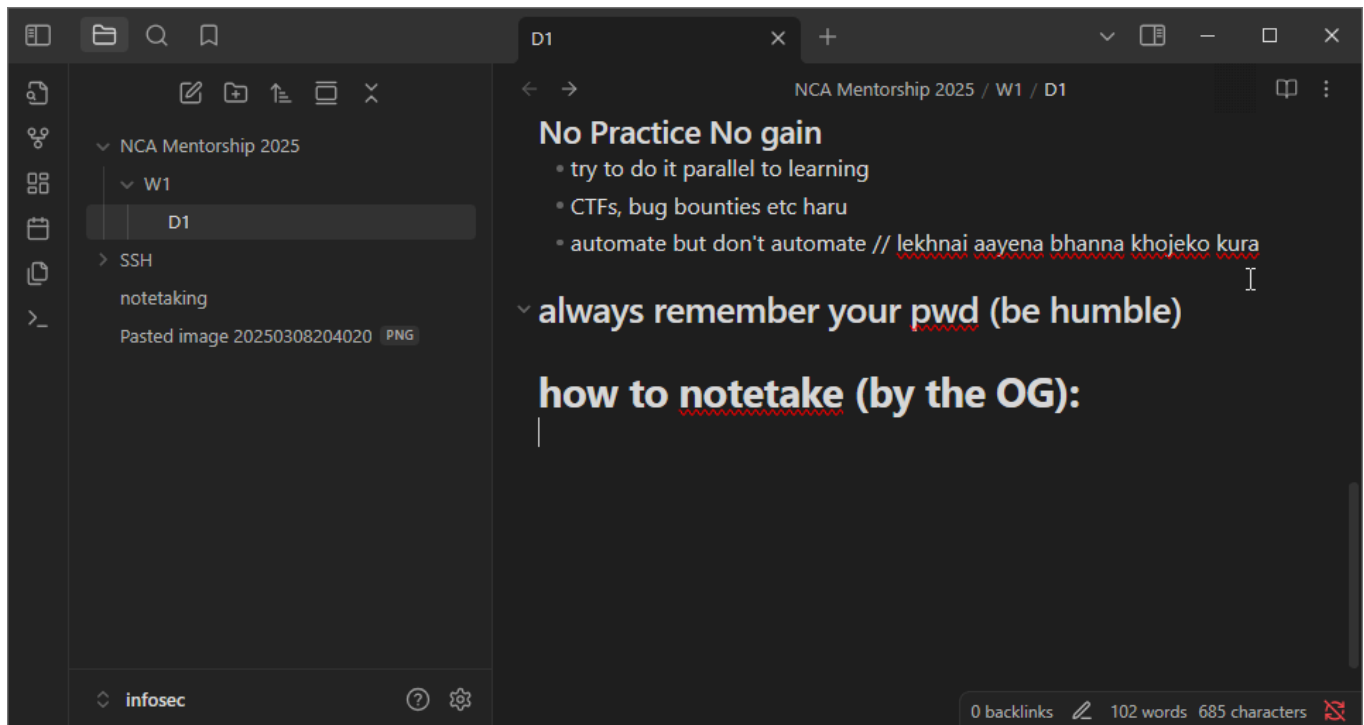

Practice huhu

No Practice No gain

- try to do it parallel to learning
- CTFs, bug bounties etc haru
- automate but don't automate // lekhnai aayena bhanna khojeko kura

always remember your pwd (be humble)

how to notetake (by the OG):

don't do this:

- NO W1D1s and no copy pasting, always hands-on and then put it in
- group by topics(subjective) and make it practical to read and revisit
- make it descriptive so that timro future self le sarara herne bittikai bujhos

Think like a `hecker`
